Find a Juliana Retailer

Juliana Group is a leading global supplier of quality residential greenhouses. Founded in 1963 by Mogens A. Stærmose in Odense, Denmark, the family-owned company is now owned by third generation, Nikolaj Stærmose. Headquarter and production remains Odense-based with subsidiaries in the UK and Germany. Juliana Group exports to more than 20 countries.

'We help people grow'. That is why our brands Halls, Juliana, and Gabriel Ash all set the frame for experiences that are as natural as they are magical. Despite our long history, we're future-focused and curious on how we can improve the sustainability of our greenhouses as well as whatever you grow inside them. THE NEW JULIANA

JUBII 60 – 10,9 M²

We are excited to unveil our latest addition to the Juliana range, the Jubii 60 10,9 m². This high-quality greenhouse is a smaller version of the popular Juliana Jubii 60 15,1 m² and provides the perfect solution for all your gardening adventures.

The high eaves create room for the double stable door to be placed on the long side offering a great sense of space. The size of 10,9 m² opens countless possibilities, whether you're nurturing the perfect tomato variety for your summer salads or designing a peaceful oasis for relaxation.

Discover more about the Jubii series on page 6.

BUILT ON STRONG TRADITIONS

Juliana Jubii 60 was designed with features from our favourite models in mind and offers a spacious garden room with lots of space for your greenhouse dreams.

The extra high eaves allows for the double barn door to be placed on the long side while maintaining the classic greenhouse shape and the option for roof embellishment. The spacious feeling provides ample room for both people and plants.

As a special feature, the profiles of the greenhouse are black lacquered, just like the doors and windows

Juliana Jubii 60 was introduced as a special anniversary model in celebration of Juliana's 60th anniversary in 2023. This greenhouse model has quickly become a bestseller, which is why this model has been developed in yet another size, to make this beautiful model accessible to all types of gardens.

Model Jubii 60	Profile colour	Width (cm)	Length (cm)	Eaves* (cm)	Ridge* (cm)	Door width (cm)	Door height (cm)	Roof vents	With 3 mm long pane toughened glass	Steel Base

HARVESTING SQUASH, CUCUMBERS AND MENTAL ENERGY

The Juliana Oase is for those seeking a unique, high-ceilinged, garden room. It provides space for unfurling and room for creativity.

Experiment with herbs in pots or with clusters of grapes. Pick melons, lemons and kiwis while creating a lovely atmosphere. Or create your own space for reflection.

The possibilities in this square-shaped greenhouse are almost endless. The double stable doors, paired with two side windows and the ventilation cowl, provide optimal air circulation.

The cowl features wax-filled cylinders that open automatically as the temperature increases.

The sky is the limit in this oasis oozing with atmosphere. In a Juliana Oase, aesthetics and functionality converge in perfect harmony and will fulfil your gardening dreams for years to come. Let your soul take root and enjoy your budding vegetables.

EXTEND THE SEASON WITH THE GRAND OASE

The Juliana Grand Oase is the perfect choice for gardeners with big greenhouse plans. There is plenty of room for all of the family's growing projects as well as a space to relax and enjoy the view of the garden.

In the Grand Oase the double stable doors are located on the long side of the greenhouse, creating an airy feel and easy access thanks to the low threshold.

The sides are almost two metres high and together with the pyramid shaped roof structure, the greenhouse offers plenty of space. You can easily divide the space with cultivation on one side and a seating area in the other and enjoy easy access to both.

DREAMING OF A GREENHOUSE ...

In each garden, the dream of a greenhouse is different and unique. Do you dream of a greenhouse full of vegetables, herbs and colourful flowers? Or a unique outdoor venue with room for relaxation and socialising, or a quiet mindful space? With a Juliana Grand Oase in your garden there is room for everything.

In a Juliana Grand Oase there is room to lengthen the seasons. In early spring, only a few rays of sun are needed to make the greenhouse a warm haven. During the summer, the greenhouse can be perfect for the late evening hours, even when the dew falls. And when the sun loses its power in late summer, you can extend the season well into autumn and have wonderful days in the greenhouse.

In a spacious Juliana Grand Oase there is room for your dreams.

VERANDA

#JulianaVeranda

LEANING A GREENHOUSE AGAINST A WALL

The Juliana lean-to is for anyone with an unused wall in the garden. Leaning a greenhouse against a house enables both structures to be heated by the sun during the day. At night, the wall emits heat to the greenhouse, thereby creating excellent

conditions for growth during the entire growing season. Extend the summer with this extra source of heat and settle down in a deck chair in early spring or enjoy the last rays of summer as the leaves turn brown in autumn.

Pleasant moments in the garden

Model Veranda	Profile colour	Width (cm)	Length (cm)	Eaves* (cm)	Ridge* (cm)	Door width (cm)	Door height (cm)	Side vents	With 3 mm long pane toughened glass	Steel Base

PERFECT FOR URBAN GARDENING

Introducing the Juliana Urban series, perfect for urban gardening. Now you can grow hard to find vegetables and herbs right on your balcony or in your courtyard. With the Urban series you will have the option to pursue your gardening interests and exercise your green fingers, even without a big garden.

No matter where you put it, you will be able to pursue the experience of growing your own herbs and spices and finding joy at the same time.

Two removable plant shelves allow you to take your herbs straight to the kitchen or dining table.

Juliana Urban is the perfect fit for your balcony, terrace, against the wall, or in the city garden.

URBAN

These models come with a removable shelf

Balcony - 0,16 m²

You can attach your Juliana Balcony to the rails of the balcony or mount it on the wall with the supplied brackets.

This model comes with two removable shelves

City Greenhouse - 0,32 m²

Four sturdy wheels allow you to move the City Greenhouse to the sunny spot on your balcony.

In Juliana Vertical you will have room for your plants and at the same time still have a small working space for your gardening tools.

Alu Shelf

The black powder coated aluminium shelf is light and elegant in its appearance. 150 x 15 cm. Item.no. F04504.

Plant Shelf

Juliana plant shelf fits all Juliana greenhouses. An elegant leather suspension system makes it possible to put the shelf anywhere in the greenhouse – or even take it with you to the dining table when your dinner needs a savoury touch from your herbs. 36 x 14,5 x 5,6 cm. Item.no. F04572. 76 x 14,5 x 5,6 cm. Item.no.F04573.

ACCESSORIES THAT COMPLETE YOUR GREENHOUSE

Elevate your greenhouse with the right interior setup. The accessories on page 30-33 are compatible with all Juliana models.

Brackets

The black brackets are installed in the profiles. This gives the opportunity to create a shelf that fits the greenhouse perfectly. Pack of 3 pcs. 25 cm. Item.no. F04811. · Pack of 3 pcs. 50 cm. Item.no. F04813.

Top Shelf

Top shelf created for cultivation at height. Can be placed between roof braces. Made of black powder coated galvanized steel and designed to be used for bottom watering of your plants. 718 x 172 x 60 mm. Item.no. F04843.

Integrated Greenhouse Shelves

The black powder-coated greenhouse shelf is designed to be used for bottom-watering. This is practical because it makes it easier to keep seedlings, herbs, etc., alive.

15 x 142 x 3,5 cm: Item.no. F04570. 15 x 213 x 3,5 cm: Item.no. F04571.

Solar LED Lamp

Solar powered LED lamp. Can be fitted inside or outside the greenhouse.

Item.no. F04841.

Plant Spiral

Flexible support for tall plants such as cucumbers and tomatoes. Pull out the spiral to the desired length (max. 2 metres) and attach using the enclosed plant support eyelet. Pack of 3 pcs. Item.no. F04905.

Candle Holder

The metal ring is easily fitted directly to the greenhouse profiles and the accompanying glass rests in the ring. Ø: 6,8 cm. Item.no. F04852.

Bag Holder

The big metal ring is created as a bag holder that can be used for multiple practical purposes. Incl. jute bag. Ø: 30 cm. Item.no. F04850.

Pot Holder

Plant pot holder for vertical gardening. Bolts in to the greenhouse profiles. Ø: 14 cm. Item.no. F04842.

Capillary Watering-Box Planter

The planter is ideal for use both inside and outside the greenhouse. The two-piece lid also conceals capillary watering boxes from above. Item.no. F04562.

Find more accessories on
Juliana.com

Univent Window Opener

Juliana has different window openers that can automatically ventilate the greenhouse when it gets too hot inside. One of them is Univent, which is well-suited for both glass and polycarbonate sheeting. Item.no. F04031 alu. Item.no. F04040 black.

Vanlet Irrigation Unit

Automatic watering and fertilising system. Distributes water and fertiliser to plants through feed hoses, Y-shaped branch pipes and drippers. Capacity: 10-150 litres of water a day. Item.no. F04201

Water Butt

The water butt can hold 100 litres of rainwater. Besides its elegant design, the butt has a practical water tap. Item.no. F04561.

Tablet Holder

Use your tablet in the greenhouse to read garden and greenhouse articles and find inspiration on your favorite websites. The holder is placed on the special bracket which is easily mounted in the greenhouse profiles. Including mounting brackets. Item.no. F04849.

Soil Thermometer

Some plants, like cucumbers, require the temperature of the soil to rise to 18°C. Item.no. F04351.

Min-Max Thermometer

A minimum-maximum thermometer that can be bolted in to the greenhouse profile. Item.no. F04355.

Plant Rings

Ideal for attaching and supporting plants throughout the greenhouse. Attach to the greenhouse frame with a simple twist. Item.no. F04711.

Greenhouse Wire Set

A set of 2 wires to enable the fixing of shading or the training of vines inside the greenhouse. Item.no. F04848.

Ventomax Window Opener

Automatic galvanised-steel window opener. Best suited for glass. Can be set to open/close between 16°C and 25°C. Item.no. F04011 black.

Nut Caps

Small plastic caps that cover the nuts that hold the profiles together. Creates a tidy finish and protects against rust. Pack of 20 pcs. Item.no. F04846

Roller Blinds

The roller blinds is attached directly to the glass with suction pads and can easily be moved to a new location. Item.no. F04847.

Green Shading Net

Ensures fast, efficient greenhouse shading. Attached with spacers. 150 x 370 cm. Item.no. R04082. 183 x 259 cm. Item.no. R04085.

Juliana Shade Paste

Apply the paste to the exterior with a roller or brush. It protects plants from being scorched when the sun is hottest. Item.no. F04805.

Suspension Hooks

A set of 4 versatile suspension hooks to help organise the greenhouse. Item.no. F04845.

Greenhouse Heater

Paraffin greenhouse heater with a capacity of 3.6 L will heat up to 15 m². Item.no. F04453.

Aluminium Brackets

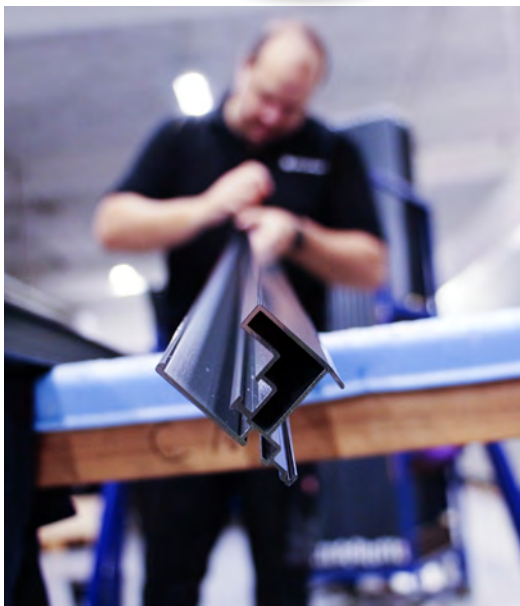

Used for supporting plants in the greenhouse, etc. Attach with cropped bolts, which enable it to bear a heavier load. Pack of 10 pcs. Item.no. F04716.

DANISH DESIGN SINCE 1963

A Juliana Greenhouse is based on the principles of Danish design – simplicity, aesthetics, and functionality. The sturdy profile structure makes the greenhouses solid and functional and at the same time it is a pleasure to the eye. Juliana has attention to detail and the greenhouses are built as an aesthetic frame.

With Juliana, you get a greenhouse characterised by Danish design – from the development of an idea to producing the finished product.

Read more about Juliana, production, and quality on Juliana.com.

Juliana Group is Denmark's largest producer of quality greenhouses for private use, setting the stage for experiences that are as natural as they are magical. For us, the greenhouse is about what you do in and around it, what you grow, and how you grow. We Help People Grow.

Gutter with Leaf Guard

Integrated into the gutter is a leaf guard that ensures a minimal amount of leaves and easy cleaning of the downpipes and gutter. The plastic catch in the gutter ends latch the flap. The downpipe has a diameter of 40 mm and is attached directly to the gutter.

Details that Give the Finishing Touch

Metal fittings, cover plates, nut protectors etc., complete the greenhouse.

Double Stable Door

Keep the lower parts of the stable door closed to keep uninvited large and small animals away and the upper part open for ventilation.

Intelligent and Elegant Ventilation

The cowl on the Oase and Grand Oase has beeswax-filled cylinders. The heat in the greenhouse expands the beeswax in the cylinders, and the cowl is raised and ensures the necessary ventilation.

Door Handle with Integrated Lock

The door is provided with a door handle in stainless steel with an integrated lock.

Low Threshold for Easy Access

The door has a low threshold, which levels the entrance and provides easy access for wheelchairs, wheelbarrows and small carts.

Intelligent Construction and Functional Aesthetics

The roof pitch is 30 degrees to ensure an optimal influx of light for growing on the North European latitudes.

Functional aesthetics

**12
YEAR
WARRANTY**

Strong Aluminium Profiles

The robust profile construction supports the fact that the greenhouses are developed and tested for Scandinavian weather conditions. When toughened glass or polycarbonate panels are glued to the profiles with silicone, significant strength is achieved, helping to stabilize the entire structure and make the greenhouse extra strong. The powder-coated profiles undergo continuous tests, meeting internationally recognised standards and are covered by our 12-year warranty*.

Long Pane Toughened Glass Gives a Nice Finish

Toughened glass in long panes and glazing capping for fitting, the glass gives a beautiful look without the traditional glass overlaps and glass clips.

*You can read the full warranty statement on Juliana.com

BEFORE BUYING A GREENHOUSE

A greenhouse is typically a long-term fixture in the garden, so it's important to determine what best meets your needs and preferences.

Consider Both Footprint and Height

When selecting a greenhouse, it's important to consider not just the footprint but the height as well. A greenhouse with a side height of at least 150 cm and an overall height of more than 2 metres creates a spacious environment, allowing you to stand upright while working with your plants or using it as a relaxation space. While the size of your garden will influence your decision, it's essential to clarify how you intend to use the greenhouse. Will it be a sanctuary for relaxation, a place to grow vegetables, or a combination of both?

Space for Growing and Entertaining

If you plan to host family dinners when the weather doesn't permit outdoor dining, you may need extra space. However, even a smaller greenhouse can accommodate a dining area if the space is used wisely. The crops you wish to grow are equally important. Certain plants, like melons, require more space, and many people underestimate how much room they'll need. Once you start enjoying home-grown tomatoes and cucumbers, you may find yourself wanting more space. Consider whether you'll focus on smaller herbs or opt for larger, more space-demanding crops.

Selecting the Ideal Greenhouse Shape for Your Garden

Greenhouses come in many shapes. While the classic rectangular design is the most common, other options include lean-tos, pavilion styles, and orangeries. Plants like tomatoes will thrive equally well in a round or square greenhouse. Ultimately, the choice of shape comes down to your personal style preferences and how you envision the structure fitting into your garden.

Glass and Polycarbonate

Glass offers the most elegant appearance, while polycarbonate is the more practical option. Toughened glass has the added benefit of crumbling into small, blunt pieces if it breaks, unlike traditional greenhouse glass, which shatters into sharp fragments. Polycarbonate, on the other hand, provides insulation, helping to balance temperature fluctuations between day and night, making it easier to keep your greenhouse frost-free during winter.

In the Juliana range, all models are available with long-pane toughened glass, and some models are also offered with polycarbonate. The long-pane design eliminates the issue of algae growth, which often occurs with over-lapping glass. Toughened glass is also much stronger than standard greenhouse glass.

Our 3 mm toughened glass provides durability and flexibility against impacts, as shown in this video demonstrating the strength of our glass options.

Additionally, when the glass is bonded to the frame with silicone, it further stabilizes the structure, ensuring a robust greenhouse capable of withstanding various environmental challenges.

A Good Base is Important

For optimal stability and to install the door construction at ground level, you need a base for your greenhouse.

With a suitable Juliana base for your Juliana greenhouse, the respective door construction will be perfectly integrated. Additionally, a Juliana base, with its integrated ground anchors, provides excellent stability for your greenhouse. Therefore, we recommend purchasing a Juliana base, as this ensures the door construction is perfectly integrated and gives your greenhouse the best possible stability.

It is generally also possible to build your own base for the greenhouse. However, you should pay close attention to the stability and height of your base to ensure the correct alignment with the door construction. Please note that most insurance companies only cover damages if a suitable foundation has been correctly installed and anchored into the ground.

With or Without Dwarf Wall

Grand Oase 13,0 and 18,8 as well as Premium 13,0 are also available with shortened profiles, allowing you to establish the greenhouse with a fixed base. See pages 10 and 20-25. You will need to establish the foundation yourself and build a wall to anchor the greenhouse. Materials for the wall solution are not included with the greenhouse. The wall is a 'build-it-yourself project' before the greenhouse can be assembled.

Building Permit

For building permission in relation to greenhouses, we recommend that you investigate local regulations.

ASSEMBLY

Assembling a Juliana greenhouse can be a 'do-it-yourself' task. Alternatively, if preferred, you can hire skilled workers to take care of this for you.

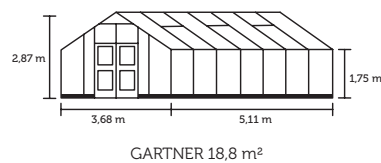

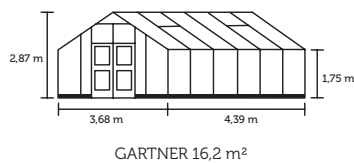

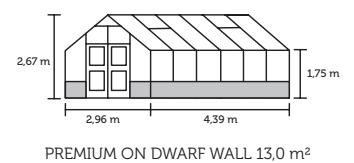

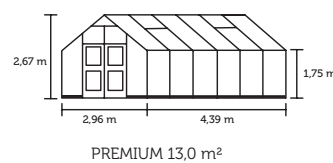

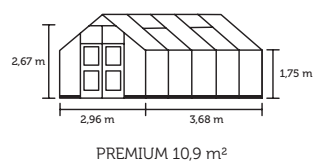

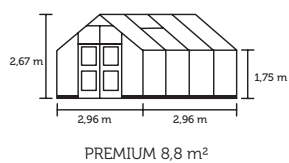

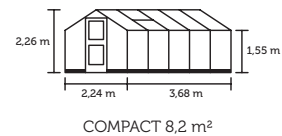

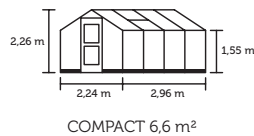

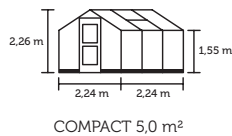

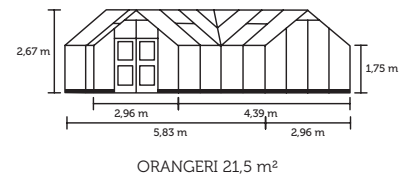

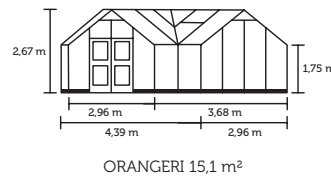

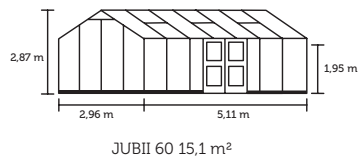

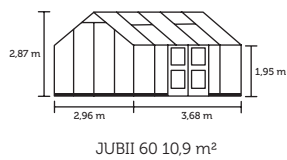

If you choose to complete the installation work yourself, you would usually have to

spend 2-3 days with a 'normal' greenhouse, and you must plan the task realistically. E.g. place the base firmly on a level surface and wait for the concrete to dry before starting any assembly work.

At **Juliana.com (Help & Support)** you will find videos that will help you through the construction process.

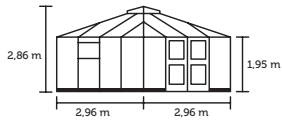

See more about greenhouse assembly and find the latest assembly instructions at **Juliana.com**.
